Klean-Strip® Green Never Worked So Well

Klean-Strip® Green™ are the products that are better for the environment. When you compare standard products with the Klean-Strip® Green™ lineup, you'll find our eco-friendly products are not only formulated for effective performance, but also have a reduced impact on the world in which we live. Klean-Strip® Green™ offers products that:

- Contain more natural and renewable resources
- Emit fewer VOCs and fumes
- Have reduced levels of hazardous air pollutants
- Are biodegradable
- Are made with less petroleum distillates

When you're looking for products that perform well and are better for the environment, remember that you can reduce your carbon footprint with Klean-Strip® Green™.

Klean-Strip® Green™ Denatured Alcohol- QKGA75003

Our Klean-Strip® Green™ Denatured Alcohol delivers the same great performance as regular Klean-Strip® formula - but is made from 95% natural and renewable resources.

Klean-Strip® Green™ Denatured Alcohol produces the hot, clean, odorless and smokeless flame you desire in a marine stove or alcohol burner.

As a consumer choice, it's a great way to reduce the impact you can have on the environment. 6 QT /CASE

Klean-Strip® Green™ Lacquer Thinner- QKGL75009

The ideal combination of environmental friendliness and exceptional performance, Klean-Strip® Green™ Lacquer Thinner is an eco-friendly substitute for regular lacquer thinner. The medium-drying formula thins lacquer and epoxy and clean tools and equipment after lacquer and paint projects.

Klean-Strip® Green™ Lacquer Thinner contains less than 1% petroleum distillates...contains 20% renewable and biodegradable content ...and is 99% free of hazardous air pollutants** - all of which makes it better for the environment* and a great choice for your next project.

Not intended for sale or use in the South Coast Air Quality Management District (SCQAMD). *Environmental claims on this product are in comparison to regular Klean-Strip® Lacquer Thinner. No environmental benefits are claimed on this product beyond those specifically identified on the label. 6 QT/ CASE
